

UK Innovation in Healthcare

Are you interested in learning more about commercial healthcare opportunities with UK innovations?

Healthcare UK, part of the UK's Department for Business and Trade (DBT), is attending IHF's World Hospital Congress 2023 with delegates from NHS Trusts and UK companies. They are interested in meeting with international healthcare providers like you and sharing their UK innovations globally.

The UK has a strong track record of scientific breakthroughs and is delivering the next generation of life-changing surgical treatments, technologies and services, from personalised healthcare, genomics, digital health and AI to cutting-edge medtech. Our leading science base includes Nobel Prize winning research. The NHS is the world's first health service to commit to reaching carbon net zero. One year on from setting targets, it has reduced its emissions to equivalent to a level powering 1.1 million homes.
